

portfolio / detail level: multi-faceted comparison of portfolio performance over time.

Drill-down: split portfolio into spaces OR groups of spaces.

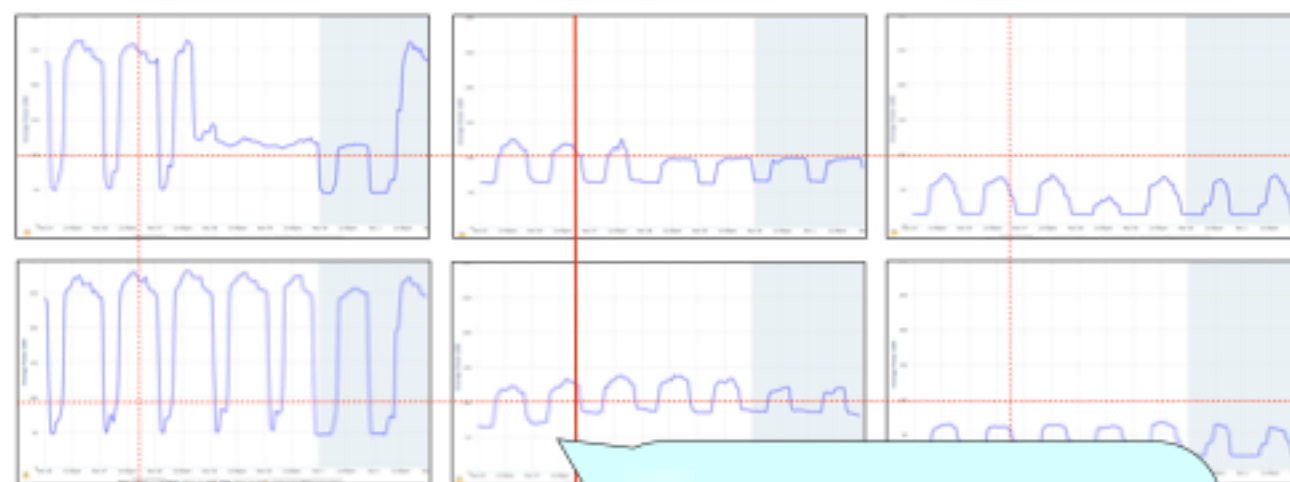

facet by
dates, or bin
by #HDDs,
#CDDs

Nov 25–Dec 2 2013

Nov 26–Dec 3 2012

Nov 28–Dec 5 2012

flexibility and scalability:
specify a grid and time
granularity, drag-drop spaces
into grid. Select rather than
filter + facet.

spaces with
"space_use:
library"

concern over scalability
re: bandwidth. Alternative: local
client?

compare across
buildings, time
intervals with
common scales:

y axis:
0–300kW

x axis:
7 days
(week 45 / 52)

linked navigation
and selection

current workaround is to
open multiple browser
windows (drawback: no linked
navigation / selection)

example i: weekly electricity demand (kW) of 3 libraries, faceted by space and year
